

# INTERVENTIONAL RADIOLOGY PROCEDURE

INTRODUCING

 **GIRI Gleneagles**  
Interventional Radiology Institute (GIRI)

**Gleneagles Hospital**  
RICHMOND ROAD, BENGALURU

# Interventional Radiology Procedures

The Gleneagles Interventional Radiology Institute (GIRI) represents the pinnacle of minimally invasive medical care. Our state-of-the-art facility houses advanced imaging technology and a dedicated team of specialists led by renowned experts. We offer precision treatments that transform traditional surgical procedures into minimally invasive solutions, providing better outcomes with faster recovery.

At GIRI, we understand how varicose veins can impact your quality of life. Our dedicated clinic combines cutting-edge technology with expert care to provide comprehensive vein health solutions under one roof.

# Advantages of Interventional radiology procedures

- **Hepatobiliary & GI:** Targeted treatments reach precisely where needed, reducing damage to healthy tissue. Procedures like TACE and TARE offer hope for previously inoperable liver conditions
- **Genitourinary** (urinary and reproductive systems): Preserves organ function while treating complex conditions, with most procedures performed through a pinhole incision
- **Pain Management:** Precise targeting of pain sources under image guidance ensures better outcomes than blind injections
- **Head & Neck:** Eliminates the need for visible surgical scars and reduces risks associated with traditional neck surgery
- **Vascular:** Treats complex

vascular conditions through tiny incisions, avoiding major surgery and associated complications

## Hepatobiliary & GI Interventions

- TACE/TARE for liver tumors
- TIPS for portal hypertension
- Biliary drainage and stenting
- Post-transplant care
- Advanced hemorrhoid treatments
- Portal vein embolization

## Pain Management Solutions

- Image-guided intra-articular injections
- Precision nerve blocks
- Advanced nerve ablation techniques
- Targeted embolization procedures
- Custom pain management protocols

## Genitourinary Interventions

- Nephrostomy and ureteric stenting
- Varicocele embolization for male fertility
- Fallopian tube recanalization
- Post-transplant care
- Advanced kidney drainage procedures
- Specialized fertility treatments

## Head & Neck Interventions

- Thyroid and parathyroid ablations
- Lymph node procedures
- Vascular malformation management
- Precision tumor treatments

## Vascular Interventions

- Dialysis access management
- PICC line placement
- Fistula salvage procedures
- Central and peripheral angioplasty
- AV malformation treatment
- Specialized vascular stenting

## Benefits:

- Targeted treatment delivery
- Minimal damage to healthy tissue
- Reduced hospital stay
- Lower complication rates
- Often curative or life-extending
- Quick return to daily activities

## Dr M.C. Uthappa

Director, Interventional Radiology  
& Interventional Oncology  
Gleneagles Hospital,  
Richmond Road, Bengaluru

## Our Expert Team

Dr Uthappa and Team have authored over 40 publications in peer-reviewed journals. He has been a conferences since 2008 and serves as an international proctor for TARE and a national proctor for TIPSS procedures. regular speaker at national and international
