

NONSURGICAL TREATMENT OPTION FOR **HAEMORRHOIDS** (PILES)

INTRODUCING

GIRI Gleneagles

Interventional Radiology Institute (GIRI)

Gleneagles Hospital

RICHMOND ROAD, BENGALURU

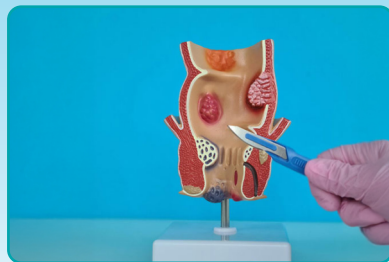

Nonsurgical treatment option for haemorrhoids (Piles).

The Gleneagles Interventional Radiology Institute (GIRI) represents the pinnacle of minimally invasive medical care. Our state-of-the-art facility houses advanced imaging technology and a dedicated team of specialists led by renowned experts. We offer precision treatments that transform traditional surgical procedures into minimally invasive solutions, providing better outcomes with faster recovery

Superior Rectal Artery Embolization (Emborrhoid Technique)

A revolutionary daycare procedure that effectively treats hemorrhoids by precisely blocking their blood supply..

Who Should Consider This Treatment?

- Patients with Grade 1-3 internal hemorrhoids who are symptomatic
- Those who have failed conservative treatments including:
 - Fiber supplements
 - Dietary modifications
 - Topical creams
- Patients experiencing recurrent symptoms after surgery
- Those seeking to avoid surgical intervention

Benefits of Emborrhoid Technique

- Non-surgical and minimally invasive approach
- Shorter recovery time
- Reduced pain compared to traditional surgery
- Preservation of anorectal function
- Ideal for non-surgical or high-risk candidates
- Day care procedure
- Quick return to normal activities

Common Symptoms We Treat

- Anal swelling or lumps
- Pain during bowel movements
- Bleeding during bowel movements
- Persistent itchiness

Package Includes:
